OLIGOLAB IV SKILLFUL sessions

Oligolab Intravenous (IV) sessions are unique and specialized to improve the causes rather than the symptoms of health problems. Being directed to balance metabolic cellular chemical reactions, they are directly involved to improve cell health, energy production and hence organ functions.

As an example of such skillful sessions in different clinical specialties, Oligolab may help improve:

-IVF customized sessions

-PCO

-Pre, post, menopause

-Male health (libido, fast ejaculation, infertility, etc..)

-Female health (libido, irregular cycle, vaginismus, infertility , etc..)

-Eczema

-Cellulite

-Weight management

-Peptic ulcer

-Migraine

-Convulsions

-Addiction

-Aging problems

-Metabolic problems

Etc…
